# SPLICES SAVED... ...PROBLEM SOLVED!

*“Greatest innovation to come into the electric utility industry in 40 years!”*

For the transmission segment, having flexible legs and easily installed with Sticks or Bare-Hand in sizes up to the largest common conductors.

Simply by flexing the legs, the same device is readily installed on Dead-Ends & Suspension Clamps and an integral tether provides mechanical reinforcement for those applications.

# ClampStar™ REPAIRS FAILING SPLICES WITH NO POWER INTERRUPTION!

- Splice replacement no longer necessary!
- Installs in a fraction of the time with 1 man and a Hot-Stick!
- No Mechanical Grips, Come-Alongs, Jumper Cables or Cutters needed.
- Meets ANSI C119.4 Class AA **EXTRA HEAVY DUTY**
- Restores both electrical and mechanical integrity on weathered conductors
- No need to cut power or lines, installs over existing splice
- Increase ampacity / Up-rate systems
- Significantly Safer than traditional splice replacement.
